

I, as an XM radio subscriber urge the FCC to reject the NAB petition #04-160. I bought an XM radio receiver and subscription so that I wasn't bothered all the time by useless commercials found on "free-to-air" stations. I like the fact that the XM instant Traffic and Weather lets me hear the information I need to know, when I want to know it....unlike regular FM radio you have to sit through tons of commercials before they decided to tell you the traffic and weather.
